

# Vortex/MySafe Vault Review

MySafe Vault is a revolutionary way to completely and totally secure any sensitive or private digital information you have.

It utilizes cutting edge blockchain technology that ensures that nobody except you can access this information, keeping it safe from theft and misuse.

## **Capitalize on an undefeatable solution to the problem of cybersecurity**

Examples of information that you may want to store in the MySafe Vault include wills, corporate intelligence, sensitive information, plans for innovative products or projects and anything else you need to keep to yourself.

All information is encrypted, and nobody except for you (not even the Vortex company itself) can de-encrypt your files.

The blockchain technology and encryption ensure that no competitor, enemy, governmental agency or hacker can get your secure information; it is 100% protected.

For total anonymity, you are only able to access the Vortex ecosystem by purchasing Vortex tokens (VTX), which are a cryocurrency similar to Bitcoin.

Vortex tokens are ERC-20 compliant, which is the accepted standard and are on the Ethereum platform.

Only a limited number of Vortex tokens will be sold, and they are on sale now for the first time, so get them while you can!

Since security is such a big issue now with data breaches happening right and left, they anticipate a huge demand for the MySafe Vault, and it will be first come, first served.

## **About Vortex**

For the Presale event, which is going on now, the company has set the price of \$0.20 per VTX, and you can pay in US dollars, Ether, Bitcoin or Litecoin.

While you will use some VTX to pay for your MySafe Vault and other products from MySafe, you can also keep them as an investment.

If you keep VTX tokens, you qualify for a loyalty bonus, which will pay out dividends based on 20% of the company's net profits for the next 10 years.

As if that isn't enough, if you buy between 1,000 and 5000 VTX tokens, you will get a 5% discount on all MySafe products.

If you buy between 5,001 and 20,000 tokens, you get a 10% discount and if you buy more than 20,000 tokens, you get a 20% discount.

VTX is a totally liquid currency and you will be able to trade them, just as many people worldwide have made millions trading Bitcoin and other cryptocurrencies.

It's like being there when Bitcoin launched – imagine how much money you would have now if you have invested in Bitcoin at the very beginning!

This is your chance to get on the train to cryptocurrency profits, and you know that it will be around for a long time because Vortex has solved the biggest problem plaguing our modern society – cybersecurity!

Don't miss this opportunity for incredible profits and get in on the ground floor of the next big thing in cybersecurity by getting your VTX tokens now before they're gone.

**Get your Vortex tokens now – limited time!**
